

Fish Tank & Pump Installation Guide

Package content:

Step 1: Filter box setup

1. Put the filter bio-ball in the lower deck of the filtration box.

2. Place the upper deck on.

3. Connect the black #7 tube to the clear plastic water tube in the upper tray.

4. Place the water diverter #8 on the bottom filter tray.

Step 2: Water Pump Setup

1. Connect the suction head #11 to the extension tube #4, connect the tube end to the submersible pump.

3. Optional bubble mixer air valve, if you would like to have the pump spray out water with air mixed in it then connect the pump with the optional air mixing valve #3.

2. Put the entire pump with tube into the tank find a suitable location near the right hand side where later the #7 black water tube will connect to the pump.

4. On the top of the tank there are two holes in the back one is for the optional air mixing valve and one is for the air pump tube .

Step 3: Air Pump

1. Pull the B tube through the hole and connect the tube to the single end of the air tube splitter #9

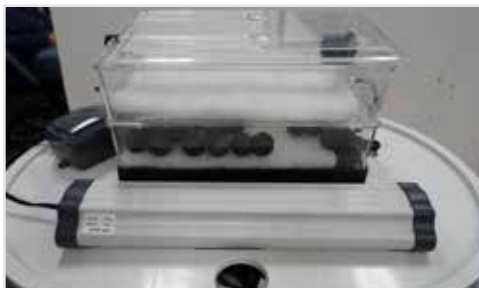

2. Connect the other two end of the splitter #9 to the air pump.

Step 4: Place all together

1. Put the filtration system tray on top of the tank and connect the black water tube #7 through the hole to the pump as picture shown.

Put the glass cover on the top of tank where the light will go to prevent the light from falling into the tank. Put the light on the top of the glass. The system is ready to be use.

Manufacturer Limited Warranty

All Vepotek products are manufactured and tested with the highest quality standards and rigorous quality control process. This warranty is limited to the non-commercial use of Vepotek products purchased and installed in the United States and Canada.

Vepotek Brand Limited Warranty on Aquarium Tanks

Vepotek warrants our aquarium tanks for 1 year from leakage due to manufacturer defect to the original purchaser of the product (Receipt from a valid authorized Reseller Only). The following conditions must be met: The aquarium tank needs to be placed on the appropriate stand for the warranty to be valid. The appropriate stand is the stand that came with your Vepotek product. Failure to do so will void your warranty. Any addition, modification, or changes that were made to the aquarium tank by any party other than Vepotek will void the warranty. Cabinet or Stands that come with Vepotek products must be used in order to keep the warranty valid. If you purchase a Vepotek Tank without a stand it must be appropriately placed on an evenly flat, level surface always that supports the entire surface of the product. Mishandling and physical abuse will void the warranty. The repair and replacement of your product will be at the full discretion of Vepotek. Please contact us immediately if there are any leaks. Return shipping to Vepotek must be prepaid. Vepotek's liability under the terms of this warranty is limited to the replacement value of the product and Vepotek shall not be liable for the replacement of wildlife, plants, or consequential damages. Vepotek shall not be held liable for removal, reinstallation, shipping, or other costs incurred in obtaining warranty replacements. Proof of purchase from an Authorized Reseller must be provided upon making any claim.

In Addition:

- Vepotek only warranties its own manufactured products any bundled products are warranted by their respective manufacturer
- Scratches, crazing, or any other damages caused by the use of inappropriate cleaning or cleaners will void the warranty
- Any other fixtures or accessories included (lights, pumps, etc. . .) are warranted for a period of ninety (90) days from the date of original purchase

Terms and Guidelines:

- Be sure the bottom of the tank is always fully supported by your stand (in cases of products without stands or cabinets included the full support of the entire bottom).
- Do not replace fluorescent lights with incandescent lights
- Additional lighting can be mounted near but not on the aquarium tank to disperse the heat
- Use caution when installing and/or adjusting any electric device in your aquarium to prevent harm to yourself or life in the aquarium
- The aquarium tank is easily and best cleaned with a soft cloth and warm water
- Do not use any abrasive materials or cleaners and ammonia based cleaners for your aquarium
- Do not use alcohol of any kind to clean the aquarium
- Do not lift the aquarium when it has water or gravel in it

Warranty is intended for tanks used only as an aquarium for keeping livestock. Any tank that is built for tradeshow display, experimental lab vessel, or non-aquarium use is Void of warranty. This includes tanks that are repeatedly drained and filled as part of their use. Any tank that is mobile in any way is also void of warranty this includes Educational tanks that travel, trailered tanks, and similar.
